LinkedIn - *https://www.linkedin.com/in/dnyaneshwar-divekar-190663236/*

**10**+ years experience.

**QA Lead** at Encora Inc

Starting from today, first session of JavaScript.

Selenium - **Shift** + **Alt** + **F** for setting the program in proper format (without indentation error or unnecessary spaces).

**1st day** of Playwright

Installing playwright from vs code command prompt

Playwright site also bookmarked in chrome

We need to install playwright for every new project folder.

Writing 1st testcase (syntax explanation)

Explained locators in short

Locators

*await* keyword is used to wait for certain actions.

Check documentation on locators in playwright shared by sir (github link)

Using getByRole for accessing webelements

Using getByText, getByLabel, getByPlaceholder, getByAltText, getByTitle, getByTestId

Web Actions - Performing actions on webelements

Q) Sir can we extend the timeout limit for playwright ui mode? because the OrangeHRM takes more time to load and then the timeout error occurs.

Dropdown selection

Codegen – npx playwright codegen *web link*

*Check recording for today's session.*

5<sup>th</sup> December 2025

Test video recording using playwright (**the video duration will be the same as the time taken by the test to run**)

Running tests in –headed mode.

Handling pop-ups

Reports generation using playwright (**check pdf from notes for more details**)
